## Ace Unmodified Cable Descrambler & Cable Boxes

Own a digital cable box? We have nothing for digital cable box descrambler systems. If your cable system uses digital cable boxes, digital cable box descramblers or a digital cable signal, the unmodified cable box we sell will not work on your digital cable box descrambler system. We do not sell digital cable descramblers.

Thank you for shopping at Ace Unmodified Cable Descramblers. If you want to buy an unmodified digital cable box, book mark this website & check back in the future. When digital cable box descramblers that are unmodified become available, we will display them on this site.

### What is A Unmodified Cable Box Descrambler / Converter?

- 1. We offer unmodified basic channel changer types of cable box descramblers. The boxes we offer will NOT unscramble ANY pay channels, premium channels, or pay per view channels offered by ANY cable company. If you want to view pay type channels you must contact your cable company and they will provide you with a cable TV box and the services you want to pay for.
- 2. The cable boxes we offer are necessary if you own a Plasma TV without a tuner. If your current TV is not capable of tuning in channels offered from 01-125. If your TV remote control no longer works or the volume control is defective, installing A unmodified cable box will allow you to tune channels, control volume and turn on and off the TV set via the remote control that comes with the box.
- 3. Unmodified cable box descramblers act just like a VCR would. They will change your channels, tune in the signal & the cable box can also control your volume and mute and turn off your TV set via the remote control if your TV is plugged into switchable power outlet on the back of the cable box.
- 4. Unmodified cable box descramblers will not unscramble any pay signals.
- 5. Unmodified cable box descramblers can be used in extra rooms in your home.
