These radar detectors, laser jammer, hi band radar detector, lo band radar detector, laser radar detectors, laser, radar jammers are guaranteed to work or we will pay for your ticket. See below for details.

Radar detectors are effective in warning you of near by radar frequencies.

## #1 selling radar jammer!

Put an end to those speeding tickets. You can't catch what you can't see.

## The Phantom2

The all new Phantom II replaces the original Phantom of six years. The Phantom II has been completely redesigned and has a 50% larger antenna. This gives you more "gain" which equates to improved performance of jamming all the radar signals being used (7GHz - 38 GHz). This is the full range that the police are allowed to use by the Federal Communications Commission. The radar and laser jamming will protect 180 degrees in front of your vehicle. The detector will detect 360 degrees around your vehicle. Our detector has less falsing while still maintaining great sensitivity. The detector also has your standard options; dark, mute, city/highway and VG-2 protection.

The Phantom II is a high performance 4-band super heterodyne radar/laser detector with a passive radar jammer and active laser jammer built into one unit. The Phantom II detects and jams all police radar frequencies and both laser guns.

Our Jammers do not transmit radio frequencies. The radar portion is a receiver not a transmitter. This is why our jammers are legal! They use an FM chip, a mixer, and a waveguide antenna for all radar bands the FCC allows the Police to use. The lidar portion transmits a specially modulated field of light in front of the vehicle with two infrared diodes.

The radar and lidar jamming portions of our jammers confuse the radar/laser gun which prevent a hard reading of your speed. This makes your vehicle electronically invisible to police radar and laser guns.

### TICKET REBATE PROGRAM:

The "Ticket Rebate" program pays all speeding tickets for one year! There are two restrictions:

- 1) Ticket must be a radar or laser ticket.
- 2) Must be under 30% or not to exceed 15 MPH over speed limit, which ever is lower.

The Eclipse detector does not carry the Ticket Rebate program.

NOTE: Rocky Mountain Radar and its' distributors do not advocate speeding. Police can and will stop you if they think you are exceeding the speed limit. If used discreetly, our jammers can and will provide you, the driver, with that additional time needed to adjust your speed to help prevent tickets.
